

Objective:

Motivated and detail-oriented aspiring Software Engineer with a solid foundation in Computer Science and Engineering. Committed to deepening my expertise in the field while contributing to innovative software development initiatives within a forward-thinking organization.

Area of Interest:

- Web Development Frontend, Backend, Web Framework
- Data Structures and Algorithms.
- Cloud Computing and DevOps.

Education:

Bachelor of Engineering in Computer Science and Engineering. 2023-2027

Dr. Mahalingam College of Engineering and Technology, Coimbatore.

CGPA: 8.2

Higher Secondary Certificate-Matriculation Vivekananda,Paramathi velur 2022-2023

Percentage : 86%

Secondary School Leaving Certificate-Matriculation Vivekananda,Paramathi velur 2020-2021

Pass

Skills:

Technical Skills:

- **Programming Languages:** Java, C, Python
- **Web Development:** HTML, CSS ,JS
- **Database Management:**MySQL, MongoDB
- **Version Control:** Git

Soft Skills:

- **Communication:** Good verbal and written communication.
- **Problem-Solving:** Analytical Thinking.

Projects:

Smart Irrigation and Soil Moisturizing System using Arduino

- Designed and implemented a smart irrigation system using Arduino that monitors soil moisture and automatically controls watering.
- Developed the sensor interface, control logic, and irrigation circuitry, programming the Arduino for reliable automation.
- Delivered a low-cost, user-friendly solution with a 100% success rate in testing, improving efficiency and reducing water wastage.

Olio Reverse Engineering Mobile Application

- Recreated a functional clone of the Olio mobile app using React Native and MongoDB Atlas, implementing core production features with a modular architecture.
- Built key modules including authentication, item listings, request/response flow, real-time messaging, and user interaction systems.
- Designed scalable backend data handling with cloud storage and structured workflows mirroring real-world production architecture to enhance maintainability.

Hospital Management Sytem

- Developed a Python-based Hospital Management System to centrally manage patient records, appointments, billing, and staff data.
- Implemented backend logic to handle user requests, process business operations, and ensure accurate data management.
- Integrated database functionality to efficiently store, retrieve, and display hospital information.

Internships:**Training Tranis,Erode**

2 Weeks

- Developed full-stack web applications using Python, Django, HTML, CSS, and JavaScript, working across both front-end and back-end technologies.
 - Built dynamic, database-driven web applications with a focus on performance and scalability.
 - Improved functionality and user experience by implementing RESTful APIs and responsive interfaces
-

Achievements:

Won First Price in Paper Presentation for Delivering about Net Zero Energy Concept.

Certifications:

- Psychology of Learning – NPTEL.
 - Environment and Development – NPTEL.
 - Environmental Impact Assessment– NPTEL.
-
- Python Bootcamp – Infosys Springboards.

Languages known

- English – Read ,Write and Speak.
 - Tamil – Read ,Write and Speak.
